

How to measure your **Blind**

- Measure as accurately as possible – do not round up or down – provide your measurement to the nearest millimetre
- Measurements should be displayed as millimetres e.g. 10.243m = 10243mm
- Measure your opening size and provide photographs of where you propose the blind is to be attached (fascia, between pillars and attached to ceiling etc.)

Ceiling

Ground

How to measure your **Awning**

- Measure as accurately as possible – do not round up or down – provide your measurement to the nearest millimetre
- Measurements should be displayed as millimetres e.g. 10.243m = 10243mm
- Measure your opening size and provide photographs of where you propose the awning is to be attached (above window or door etc.)
